VRITIMES

AVE?

advertising value equivalency

"This article would have cost $X as an ad." Easy to calculate, easy to inflate, and it says nothing about whether anyone changed their mind or bought anything.

"AVEs are not the value of communication."

— AMEC, Barcelona Principles 3.0 (2020)

VRITIMES

4.0

the 2025 update is blunter

AMEC's Barcelona Principles 4.0 say invalid measures such as AVEs **should not be used**. Measure outcomes and impact, not just outputs.

Source: AMEC, Barcelona Principles 4.0 (2025)

outputs vs outcomes

outputs

- ✕ Number of articles
- ✕ Potential reach
- ✕ AVE (don't)

outcomes

- ✓ Tier-1 & target-audience coverage
- ✓ Key message pick-up rate
- ✓ Referral visits, sign-ups, enquiries

VRITIMES

a one-page pr report

- Objective set before the release
- Coverage by quality, not just count
- Did our key message appear?
- What audiences did next (traffic, leads)
- What we will change next time
